

**Golf Driver  
Golf GTD**

*July 1991*

# Less pollution

The new Volkswagen Golf GTD is an exciting development for the Golf.

Under the bonnet is a turbocharged and intercooled diesel engine which provides the economy of a diesel and the torque of a GTi. \*

What's more, it is acknowledged that diesels produce less harmful pollution than equivalent petrol models. So the new Golf GTD gives you more economy and more environmental responsibility.

None of this is at the expense of performance. The turbo diesel provides strong mid range acceleration and an impressive turn of speed.

A diesel it may be but dull it is not!

Nor is it lacking in equipment. For it shares a special equipment package with the ever-popular Golf Driver...

# More refinement

The new Volkswagen Golf Driver is the most comprehensively equipped Driver ever.

In three or five door versions, five speed manual or automatic and the option of a Catalyst, it has a specification which offers more than ever.

From the outside, the tinted glass and sunroof, sports wheels and tyres, with wheel arch extensions, hint at its GTi pedigree. Inside, the sports steering wheel and stylish upholstery continues the sporting look, with security and

peace of mind from the new Panasonic quick release stereo radio cassette.

This being a Volkswagen, however, the Driver – and the GTD – are especially practical. The proven hatchback design is complemented by central locking and a split-folding rear seat that extends the versatility of its passenger and load carrying capability.

The Golf Driver and GTD give more! More features, more refinement and more value.

## Technical specification

Engine, cc	1585
Power, bhp/kw at rpm	75/55 (72/50) <sup>†</sup> 5000 (5200) <sup>†</sup>
Torque, lbs. ft/Nm at rpm	92/125 (88/120) <sup>†</sup> 2500 (2700) <sup>†</sup>
Gearbox, standard optional	5 speed automatic
Top speed, mph/kph, manual automatic	104/167 (102/164) <sup>†</sup> 101/162 (99/159) <sup>†</sup>
Acceleration, 0-60 mph, secs	12 (12.5) <sup>†</sup> man. 14.2 (14.7) <sup>†</sup> auto
Fuel consumption, mpg, man/auto urban cycle	30.7/31.7 (29.1/30.4) <sup>†</sup> 48.7/40.9 (44.1/39.8) <sup>†</sup>
at 56 mph	
at 75 mph	36.2/33.2 (32.5/29.4) <sup>†</sup>
Fuel grade, unleaded leaded	95 octane (premium) 91 octane (regular)

(†) Figures apply specifically to models fitted with a catalytic converter.

## Equipment

### Special features:

Steel sliding sunroof  
Twin halogen headlamps  
Heat insulating, green tinted glass  
Central locking  
Split-folding rear seats  
Black wheel arch extensions  
6J x 14 sports steel wheels with special trims  
Low profile 185/60 R14 tyres  
Front and rear 'driver' badges (Driver only)  
Front 'Turbo Diesel' and rear 'GTD' badges (GTD only)  
Sports check upholstery  
Four spoke sports steering wheel

### Optional equipment

#### (at extra cost):

Electric windows  
Headlamp washers  
Catalytic converter (Driver only)  
Automatic gearbox (Driver only)  
Rev counter and digital clock  
Front sports seats  
Electrically adjustable and heated door mirrors  
Power assisted steering  
Space saver spare wheel

### Colour and upholstery combinations

### Warranty:

One year, unlimited mileage, mechanical  
Six years against through-rusting of body parts  
Three years against paint defects  
An optional, extended warranty scheme protects against mechanical failure beyond the manufacturer's warranty period. Please refer to your dealer for details.

Six year recovery service for vehicles maintained in accordance with manufacturer's recommended service intervals

### Servicing:

Modifications to the Golf range have enabled us to lengthen the intervals between major servicing and reduce maintenance costs. A more flexible servicing schedule has been introduced which can be tailored to suit your individual annual mileage.

For customers with under 10,000 miles a year:

An **Inspection Service** (which includes an oil change) is required every 12 months, and a **Major Service** is needed only at intervals of 20,000 miles.

For higher mileage customers: In addition to the above, a lubrication service will be required every 10,000 miles for petrol-engined cars and 5,000 miles for diesel models.
